You can also download the full version and can install the full version from here After my recent CRM2 article, I was eager to experience a fresh version of Microsoft Dynamics CRM. I already tested the beta release of CRM4 and was quite enthusiastic, so I was expecting a very powerful CRM4. But I must say that I was terribly disappointed with the full version, especially the UI. In fact, it could even be considered as a let down! Here are my 5 big reasons why CRM 4 is a let down in terms of user experience: 1 - No/Bad/Weak instructions Let's start by something basic: the explanation of what the UI is supposed to do. Whenever I use MS Dynamics, and specifically CRM, I use a lot of "point and click" or "drag and drop". The UI is supposed to make this a lot easier than it is with MS Dynamics versions past. The fourth version doesn't make this easy at all. This is a big let down for me! 2 - No intuitively hierarchy I will start with the basics: the form has no hierarchy whatsoever. The only hierarchical view you can get from the main screen is 570a42141b
